PLASTIC, STERILE, SEROLOGICAL DISPOSABLE PIPETTES

- ▶ Serological pipettes are frequently used in laboratories to transfer liquids precisely and easily.
- ▶ Finished smooth wall: Unique design that prevents cell-hanging and clumping inside the pipette wall
- ▶ Printed indicator arrow for quickly locating negative graduations when using a pipette controller
- ▶ Made of polystyrene plastic sterile
- ▶ Sterilization: Sterilized with gamma irradiation. Certified and DNase-/RNase and progene-free
- ▶ Manufactured according to the ASTM Standard Specification prescribed for Serological Pipettes

Individually wrapped
